August 14, 2017

Dear: Parents, Students, Staff and Community,

The Little Wound School Asbestos Management Plan (AMP) update, dated May 2017, identifies all asbestos in the school. The AMP requires that all school buildings be inspected or re-inspected for the presence of asbestos every three years after a management plan is in effect. The last re-inspection occurred in May 2017 and the next re-inspection will be scheduled and conducted by December 2020.

The AMP also requires periodic surveillance of areas with asbestos every 6 months. The last surveillance was conducted on May 2017 and the next surveillance will occur by November 2017.

Additionally, the AMP requires initial and annual notifications of the availability of the AMP. The AMP, including inspection reports and records, is available for public review in the Little Wound School front office or facility management during normal business hours.

Thank you for all you help and support

  
Charles Cuny  
Superintendent
